SUBJECT INDEX
VOLUME 56

Adeno-associated virus
  recombinant genomes with SV40 structure, 457
Adenovirus 2
  $Ad2^+ND4_{del}$
    helper defect, 821
  $Ad2^+ND5$
    helper defect, 821
  $Ad2^+ND5$-specified 42K protein synthesis, 814
  human
    block to transcription in monkey cells, 378
  neutralization, 896
  parental and newly synthesized DNA
    lack of evidence for methylation in productive infections, 320
  region L1
    transcripts, 879
  virion
    interaction with HeLa cells, 896
    molecular composition, 439
Adenovirus 5
  early region 1A
    gene products, 404
    missense mutants, 66
  early region 2A mutants
    isolation and analysis, 767
  early region 4
    functions, 250
  human
    early region 1 proteins, 633
  substitution mutants
    construction and analysis, 750
Adenovirus 12
  early transformation region 1A
    T antigen phosphorylation, 183
Adenovirus 35
  restriction endonuclease mapping, 647
AKR/J mouse strain
  murine leukemia virus proviruses
    chromosomal assignment, 172
Apathogenic rabies virus
  spread in vivo and in vitro, 12
Autographa californica
  nuclear polyhedrosis virus
    host range, 153
Avian myeloblastosis virus
  implications for genesis, 240
Avian myelocytomatosis virus MC29
  provirus HBI
    fibroblast transformation, 943
    gag sequences, 943
    nucleotide sequence, 969
Avian sarcoma and leukemia virus
  primary structure of p19, 31
Avian sarcoma and leukosis virus
  endonuclease cleavage of long terminal repeats, 589
Avian sarcoma virus U2
  transforming protein P68
    membrane association, 790

Bacillus subtilis
  phage SPO1
    mapping of terminal redundancy, 40
Bacterial expression vector
  identification of vaccinia virus gene, 534
Bacteriophage L
  DNA homology with genomes of phage P22, 1030
Bacteriophage P22
  DNA homology with genomes of phage L, 1030
  late regulation and lysis genes
    genetic and DNA mapping, 1030
Bacteriophage Pf3
  genome
    nucleotide sequence, 268
Bacteriophage SPO1
  B. subtilis, 40
  mapping of terminal redundancy, 40
Bacteriophage T5
  DNA polymerase gene
    transcription, 245
Bacteriophage T7
  DNA
    mutagenesis by alkylation damage, 644
Baculovirus
  A. californica nuclear polyhedrosis virus
    host range, 153
BALB/c mice
  endogenous ecotropic provirus, 798
B lymphocyte
  infection by herpesvirus sylvilagus in vivo, 60
Bovine papillomavirus
  chimera amplification, 625
Bovine rotavirus
  glycoprotein fragment immunogenicity, 1037

Capsid intermediates
  foot-and-mouth disease virus, 120
Cat endogenous retroviral sequences
  RD-114
    genetic mapping, 303
Coliphage λ
  late regulation and lysis genes
    genetic and DNA mapping, 1030
Coronavirus
  murine
    glycoprotein cleavage and fusion, 904
    host-dependent glycoprotein cleavage, 912
Coxsackievirus
  group B
    establishment of persistent infections in human lymphoid cell lines, 651
Cytomegalovirus
  gene regulation, 135
  genome
    activity in presence of PP_i analogs, 996
  human
    DNA polymerase induction, 846
    immediate-early region 1 autoregulation, 676
    immediate-early region 2 RNAs, 665
    isolation and characterization of capsid proteins, 277
    nucleotide sequence of DNA fragment, 7
  replication in smooth muscle cell cultures, 839

Deer papillomavirus
  molecular cloning, 85
  nucleotide sequence, 85
Defective retrovirus DNA
  generation
    new pathway, 779

Endogenous ecotropic provirus
  BALB/c mice
    molecular and biological characterization, 798
Endogenous retroviral envelope RNAs
  human, 176
Endogenous retroviral sequence
  domestic cats, 303
  genetic mapping, 303
  segments identical to mink cell focus-forming virus, 691
Envelope RNA transcripts
  characterization, 176
  human endogenous retroviral, 176
Epstein-Barr virus
  *Bam*HI-M early antigen, 860
  *Bam*HI-M-S early antigen, 852
  genomes
    homology with HSV-1 glycoprotein B, 807
    random association with host cell metaphase chromosomes in Burkitt's lymphoma-derived cell lines, 328
  transcription units
    structure and evolution, 987
Escherichia coli
  reovirus nonstructural protein σ_{NS} synthesis, 527

Fc receptors
  HSV-1, 489
  specificity, 489
Feline leukemia virus
  endogenous elements
    molecular analysis, 701
Foot-and-mouth disease virus
  analysis of capsid intermediates, 120
  guanidine-resistant mutants
    recombination and oligonucleotide analysis, 921
  RNA polymerase
    association with Golgi apparatus, 617
Frog virus 3
  immediate-early promoter
    trans activation by a virion protein, 495

Glycoprotein C
  HSV-1, 127
  O-linked chains, 127
Golgi apparatus
  association with foot-and-mouth disease virus-induced RNA polymerase, 617

HeLa cells
  interaction with adenovirus 2 virions, 896
Hepatitis A virus
  human
    isolation and molecular cloning of a cytolytic strain, 579
Herpes simplex virus
  delayed-early promoter, 867
  differential activation of hybrid genes, 867
  early shutoff of type 2-induced host protein synthesis

interference of type 1 virion component, 312
glycoprotein B
cross-reactivity with varicella-zoster virus envelope glycoprotein, 333
homology with Epstein-Barr virus genome, 807
immediate-early promotor, 867
monoclonal antibodies
protection against encephalitis, 930
morphogenesis
effect of cloned human interferons, 419
O-linked chains of glycoprotein C, 127
promoter VP5
bacterial chloramphenicol acetyltransferase gene expression, 19
protein synthesis
effect of cloned human interferons, 419
reduced H-2 expression, 757
suppressor cell regulation of lymphoproliferative response, 1
suppressor T cells
induction requirements, 49
synthetic glycoprotein D-related peptides
protection of mice, 1014
thymidine kinase polypeptides, 512
trans-acting regulatory proteins
modulation of immediate-early gene expression, 723
type 1
α22 protein synthesis, 207
deletion mutants in the ICP4 gene, 558
Fc receptors, 489
type 1 virion component
interference with early shutoff of type 2-induced host protein synthesis, 312
type 2 glycoprotein vaccine
human antibody response, 475
Herpesvirus saimiri
proteins
mapping on viral genome, 414
Herpesvirus sylvilagus
B and T lymphocyte infection in vivo, 60
Host range mutants
adenovirus 5 early region 1A, 66
generation of single amino acid substitutions, 66
Human adenovirus 2
late gene transcription
block in monkey cells, 378
Human adenovirus 5
early region 1 proteins
stabilities and interrelations, 633
Human cytomegalovirus
capsid proteins
characterization of constituents, 277
isolation, 277
DNA fragment
nucleotide sequence, 7
DNA polymerase induction, 846
immediate-early region 1
autoregulation, 676
common initiation site, 665
immediate-early region 2 RNAs, 665
Human endogenous retroviral envelope RNAs
characterization, 176
Human hepatitis A virus
cytolytic strain
isolation and molecular cloning, 579
Human parainfluenza virus type 3
proteins, 298
Human rhinovirus type 14
infectious RNA from cDNA clones
in vitro synthesis, 628

Influenza C virus
NS gene sequence, 221
Influenza virus
M2 integral membrane protein
characterization, 502
expression at the infected-cell surface from cloned cDNA, 502
mRNA synthesis
inhibition in cells expressing *Mx* gene, 201
replication in MDBK cells
effect of human alpha A interferon, 1049
Interferon
effect on HSV protein synthesis and morphogenesis, 419
human alpha A
effect on influenza virus replication in MDBK cells, 1049
murine
linkage of α and β genes, 216
Mx gene product
inhibition of influenza virus mRNA synthesis, 201
prevention of spontaneous deletions in vaccinia virus DNA, 75
vaccinia virus treatment, 1041

JHM virus
antigen and RNA
distribution in rat central nervous system, 434

Large T antigen
SV40, 541
transmembrane orientation, 541
Lymphoproliferative response
HSV-specific, 1
suppressor cell regulation, 1

Mammalian reovirus
genetic reassortment in mice, 613
Matrix protein
regulation of viral transcription, 386
vesicular stomatitis virus, 386
Measles virus
matrix protein
detection with monoclonal antibodies, 337
Mengovirus
inhibition of host translation, 161
Mink cell focus-forming virus
segments identical to endogenous retroviral RNA, 691
Moloney murine leukemia virus
induction of rat thymic lymphomas
concerted DNA rearrangements, 258
Moloney murine sarcoma virus
mos gene
nucleotide sequence and biochemical activities, 144
Monoclonal antibodies
HSV, 930
polyomavirus protein VP1, 365
protection against encephalitis, 930
Sindbis virus
discrimination of wild type from neuroadapted, 110
vaccinia virus, 482
Mouse hepatitis virus
nonsegmented RNA genome
recombination, 449
Murine coronavirus
E2 glycoprotein
cleavage and fusion, 904
host-dependent cleavage, 912
Murine interferon
linkage of α and β genes, 216
Murine leukemia virus
AKR/J mouse strain
mapping of two proviruses, 172
induction of rat thymic lymphomas, 258
integration region *Mis-1*
mouse chromosomal mapping, 1045
neurotropic Cas-BR-E
leukemogenicity determinants, 639
Murine retrovirus
encoding of polyomavirus middle T protein, 1023
Murine sarcoma virus
nucleotide sequence and biochemical activities of *mos* gene, 144
Mx gene
influenza virus mRNA synthesis, 201
Myeloblastosis-associated virus
type 1
proviral clone, 240
Myeloproliferative sarcoma virus
transformation of 424 cells, 284

Newcastle disease virus
fusion glycoproteins
conformational changes during intracellular transport, 341
NS gene
influenza C virus, 221
sequence, 221
Nuclear polyhedrosis virus
A. californica, 153
host range, 153

Papillomavirus
bovine
chimera amplification, 625
deer
molecular cloning and nucleotide sequence, 85
Pathogenic rabies virus
spread in vivo and in vitro, 12
Poliovirus
cytoskeletal framework, 549
metabolism, 549
Polyomavirus
DNA
patterns of methylation, 734
large T gene sequences
immortalization of primary rat embryo fibroblasts, 958
protein VP1
monoclonal antibodies, 365
retrovirus-encoded middle T protein
transformation of nonestablished chicken embryo cells, 1023
Promoter VP5
HSV, 19

control of chloramphenicol acetyltransferase gene expression, 19
Protein α22
HSV-1, 207
synthesis, 207
Protein ICP4
HSV-1 deletion mutants
isolation and characterization, 558
Protein M_2
characterization, 502
expression at the infected-cell surface from cloned cDNA, 502
influenza virus, 502
Protein p21 *ras*
posttranslational processing, 607
Provirus
integration in rat thymomas, 938
Pseudomonas aeruginosa
phage Pf3 genome
nucleotide sequence, 268
Pseudorabies virus
avirulent strains
inability to express a major glycoprotein, 307

Rabies virus
pathogenic and apathogenic
spread in vivo and in vitro, 12
stimulation of human T-cell lines
amplification by antigen-specific antibodies, 426
Rat thymic lymphomas
cellular DNA region involvement, 938
Rauscher erythroleukemia
roles of helper and defective retroviral genomes, 660
Reovirus
mammalian
genetic reassortment in mice, 613
Reovirus σ_{NS}
synthesis in *E. coli*, 527
Reovirus type 3
attachment to neuraminidase-treated cells, 356
Respiratory syncytial virus
cytotoxic T-cell response in mice, 55
Retrovirus DNA
defective
new pathway in generation, 779
Rhinovirus type 14
human
in vitro synthesis of infectious RNA from cDNA clones, 628
Rotavirus
bovine
glycoprotein fragment immunogenicity, 1037
Rotavirus SA11
antigenic variant analysis
demonstration of immunodominant neutralization site, 317
Rous sarcoma virus
RNA
characterization of ribosome binding in vitro, 683
temperature-sensitive cell transformation, 743

Simian acquired immune deficiency syndrome
isolation of a new serotype from Celebes macaques, 571
Simian virus 40
$Ad2^+ND4_{del}$
helper defect, 821
$Ad2^+ND5$
helper defect, 821
$Ad2^+ND5$-specified 42K protein
synthesis, 814
bacteria-produced small-T antigen
interaction with 56K and 32K proteins of animal cells, 325
chimera amplification, 625
induction of DNA synthesis, 958
inhibition of transformation, 373
large T antigen
oligomerization, 520
oligomers, 711
transmembrane orientation, 541
large T gene sequences
immortalization of primary rat embryo fibroblasts, 958
late RNAs
5′ termini, 1002
recombinant genomes with adeno-associated virus
structure, 457
replication origin
abolition of T-antigen binding, 293
cruciform structure formation, 293
SVT2 cells
DNA binding by super-T antigen, 102
Sindbis virus
discrimination of wild type from neuroadapted by monoclonal antibodies, 110
structural proteins
expression via recombinant vaccinia virus, 227
Spleen focus-forming virus
variants
biological and biochemical differences, 717
Suppressor cells
regulation of HSV-specific lymphoproliferation, 1
Suppressor T cells
HSV, 49
induction requirements, 49
SVT2 cells
origin binding by super-T antigen, 102

T cells
response to respiratory syncytial virus in mice, 55
Theiler's murine encephalomyelitis virus
neutralization site
localization, 886
T lymphocyte
infection by herpesvirus sylvilagus in vivo, 60
Tumor antigen
adenovirus 12 early transformation region 1A, 183
phosphorylation, 183
Tupaia herpesvirus
DNA
structure of termini, 466

Vaccinia virus
core protein, 534
DNA
prevention of spontaneous deletions by interferon, 75
gene sequence, 830
interferon-treated, 1041
neutralizing monoclonal antibodies
isolation and characterization, 482
recombinant
expression of Sindbis proteins, 227
RNA breakdown, 395
synthesis of novel 2′,5′-oligoadenylates, 1041
temperature-sensitive mutations
fine structure marker rescue, 1027
transcription of early genes, 349
Varicella-zoster virus
aberrant vaccine DNAs, 92
envelope glycoprotein
cross-reactivity with HSV glycoprotein B, 333
genome
inversion and circularization, 194
transcription mapping, 600
Vesicular stomatitis virus
matrix protein
regulation of viral transcription, 386
temperature-sensitive M-protein mutants
sequence alterations, 655

Woodchuck hepatitis virus
cloned DNA
nucleotide sequence, 978
Wound tumor virus
polypeptide synthesis, 620
